

Luxury comfort for Class B Diesel R.V.

Highly efficient heating and domestic hot water appliance in our smallest compact, efficient unit.

Two sources of energy for heating comfort.

- Uses AC shore power 120V-1500W for light duty heating and hot water use.
- Diesel fuel for heating in cold temperatures and continuous hot water.

The all-in-one design of the Aqua-Hot 100 series results in considerable cost and space savings.

Designed for high altitude camping.

Part Number	Fuel	Electric Element	Interior Heat (Max)	Hot Water (gpm)	Size	Weight
AHE-125-DN1	Diesel	Yes	3 Exchangers 22,000 Btu/h 6.5kw	.8 gpm continuous hot water	11.50”T 7.50”W 17.66”L	51 lb (empty) 70 lb (full)

Ultra Compact Hydronic Heating

Single, self-contained unit: Delivers luxurious heating using up to 3 heat exchangers with the ability to deliver .8 gpm of continuous hot water at 110°F-120°F. It's just like the luxury comfort in a traditional home but in a small compact unit.

LCD Screen and Controller: New LCD touch screen is designed for easy operational control of the 3 zones of heating independently. Operation, testing and diagnostic features give the user total control of their climate system.

RV-C™ compatible: Can display all the Aqua-Hot data functions on your display or device.

Night/Quiet Mode: Will run the fans at a slower speed to reduce noise.

High Altitude Camping: This system is designed to operate at high altitudes.

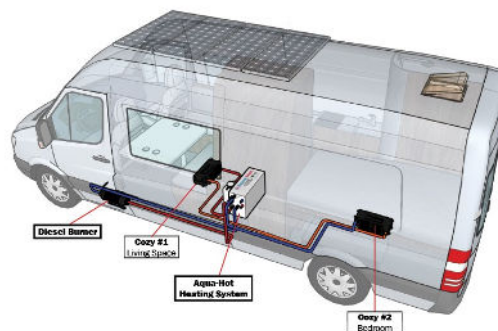

Fast Installs: Heating, domestic water and Fuel supply/outlet ports are located on the side of the unit for easy connection access.

AHE-125-DE1

Heat exchangers can be placed vertical or horizontal.
